

PLAY GIRL

INSTALLATION: CHILD'S PLAY.

One, two, you're done:
no need for special tools
or accessories!

FLEXIBILITY: VERY IMPRESSIVE.

Different external diameters?
Different materials?
Makes no difference!

ECOLOGY MEETS ECONOMY.

PLAY inspires with environmental
compatibility, durability
and cost-effectiveness

LASTS A LIFETIME. STAYS WATERTIGHT.

Longest possible service life.
Best possible tightness.
PLAY makes it possible.

PLAY. THE UNIVERSAL COUPLING.

PLAY

PLAY.

THE UNIVERSAL COUPLING.

FOR JOINING PIPES WITH THE SAME OR DIFFERENT EXTERNAL DIAMETER

A WIN FOR EVERY CONNECTION.

- Easy assembly without special tools
- No compensating rings needed
- Made of durable stainless steel
- Pressure tight up to 2.5 bar
- Multiple installation possible

Centric clamping,
no step between the pipes

Clinch points for better
corrosion resistance

Double lips on both pipes
for the highest level of tightness

Divider/spacer in the center
ensures high-precision installation

Intelligent guides on the inside, thus giving a wide
clamping range without "warping" in the rubber

PLAY is the simple, safe and fast solution for connecting pipes with the same or different external diameter. Made of stainless steel, the universal coupling is characterized by exceptionally easy installation. Double lips on each side provide tightness security. Other advantages include extreme toughness, high corrosion protection and the possibility of multiple installation.

PLAY. THE UNIVERSAL COUPLING.

Article	Clamping range	Tightening torque	Width	Weight
	external d3 mm	Nm	mm	kg
PLAY 150	160–195	17	150	2,1
PLAY 200	200–262	17	150	3,5
PLAY 200E*	200–262	17	150	4,2
PLAY 250	250–324	17	185	4,1
PLAY 250E*	250–324	17	185	5,0

* Available in two configurations: Variant E has eccentric compensating rings for joining different internal diameters. Eccentric compensating rings also available separately.
